

Human embryonic lung organoid culture including recovering organoids from matrigel for immunostaining or RNA extraction

ER Emma L Rawlins DS Dawei Sun

Updated date: Jul 23, 2020

An abbreviated version of this protocol was published in eLIFE in Jun 2017

Human embryonic lung epithelial tips are multipotent progenitors that can be expanded in vitro as long-term self-renewing organoids

DOI: 10.7554/eLife.26575
